

Machine Studies

Schedule for Run3-11,2002

December 20, 0000 - 2400

Time	Descriptions	Studiers	SRStatus
	Friday 12/20/02		
0000-0400	Single bunch limits in the lower emittance lattice	Harkay	Stored beam and injection
0400-0600	Investigate ID34 BPLD	Pietryla	Stored beam and injection
0000-0700	Booster new lattice study	Sereno	Stored beam and injection
0600-0700	Investigation of SR Dipole current change.	J. Wang	No beam
0600-0700	Thermal test of all ring supplies	Fors	No beam
0700-1100	Top-up lower emittance at 110mA	Decker	Stored beam and injection
1100-1600	Narrow band BPM test, require injection	Singh	Stored beam and injection
1600-2000	Lattice with one sector of Q1 turned off for longer straight section	Emery Sajaev	Stored beam and injection
2000-2400	Low betax insertion	Emery Sajaev	Stored beam and injection
	End of Studies
